REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

The prior art does not show or fairly suggest the claimed invention of a zoom lens apparatus having the claimed structure and claimed limitations, wherein a rejection under 35 USC 102 or 103 would be improper. Please particularly note the combination of claimed elements and claimed limitations, including at least one of the first and second frames having an inner frame which holds a lens and an outer frame which holds the inner frame to be shiftable back and forth along the optical axis and wherein any focus blurring due to variations in wavelength of subject light is compensated for by causing the drive device to shift the inner frame relative to the outer frame and thereby shifting at least one of the specific lenses (as claimed). Therefore, the claimed invention is considered to be in condition for allowance as being novel and nonobvious over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Priority

2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The following are U.S. patents which are directed to lens barrel configurations for variable lens apparatuses:

Ishikawa	4976523
Akitake	5016993
Ushiro et al	5144491
Ueyama et al	5172276
Kobayashi et al	5448413
